Introduction: widgets vs VR

Table III.
Virtual reference transaction during the pilot and previous two semesters

Semester	QuestionPoint	Meebo	Total virtual reference questions
Spring 2007	750	n/a	750
Fall 2007	837	n/a	837
Spring 2008	531	833	1,364

(Breitbach, Mallard & Sage 2009)

Novanet Live Help Usage Statistics Fall 2007 & Fall 2008

	Total Sessions	Total Service Hours	Avg. Sessions/Hour
Fall 2007 (without chat widgets)	340	674	0.50
Fall 2008 (with chat widgets)	1,885	722	2.61

(Bedwell 2009)

Methodology: survey

Who is offering subject chat reference?

- Age groups
- Subject responsibilities

Are librarians **advertising** the subject chat reference option?

How much **time** is spent **connected** to the chat per week?

How does the **frequency** of chat questions **differ** from **other methods** of individual **consultations**?

Results: general findings

- 61% of chat widget users are Millennials or Gen X
- 60% of chat widgets are equally distributed among Math/Sci/Eng, Humanities, & Social Sciences
- ~70% of librarians advertised the chat widget using one or more methods
- ~70% of librarians are are connected to the chat widget more than 20 hours / week
- In person or email consultations are frequent
- Chat or phone consultations are infrequent.

Age groups

■ Millennials ■ Gen X ■ Younger BB ■ Older BB

Subject guide breakdown

■ Math-Sci-Eng ■ Health sciences ■ Fine arts ■ Social sciences ■ Humanities ■ Business ■ Mixed

Did you advertise the chat widget?

■ No ■ Yes (class only) ■ Yes (Multiple) ■ Yes (other)

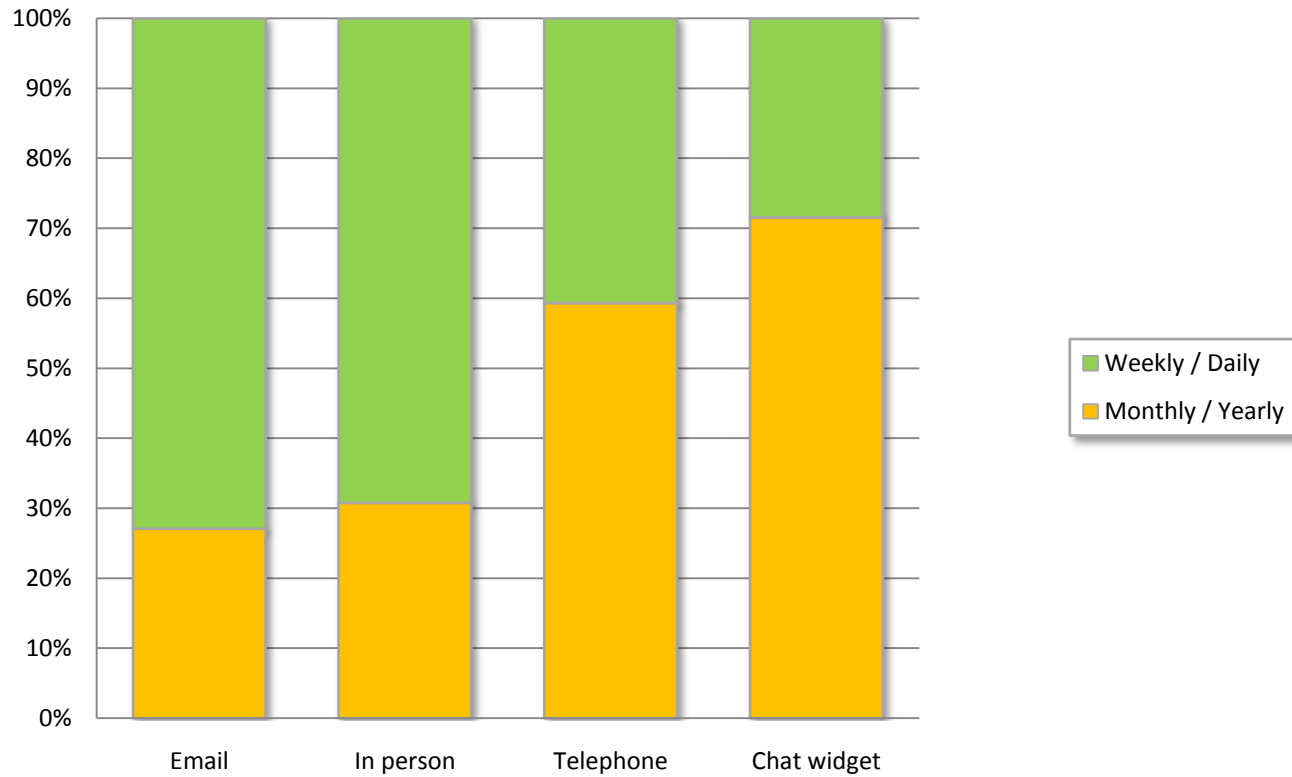

Number of hours connected to chat widget per week

0-19 20-29 over 30

Frequency of consultations

Most frequently received question types

Directional Ready reference In depth / mediated Instructional Technical

Results: connection time analysis

- Librarians who are connected longer to their chat widgets receive more chat and in person consultations.
- Librarians who are connected less to their chat widgets receive more email consultations.

Weekly or Daily consultations vs number of hours connected to chat widget

	0-19 hours	20-29 hours	30+ hours
In person	62%	68%	79%
Chat	8%	25%	54%
Email	86%	70%	64%
Phone	52%	37%	35%

Results: advertisement analysis

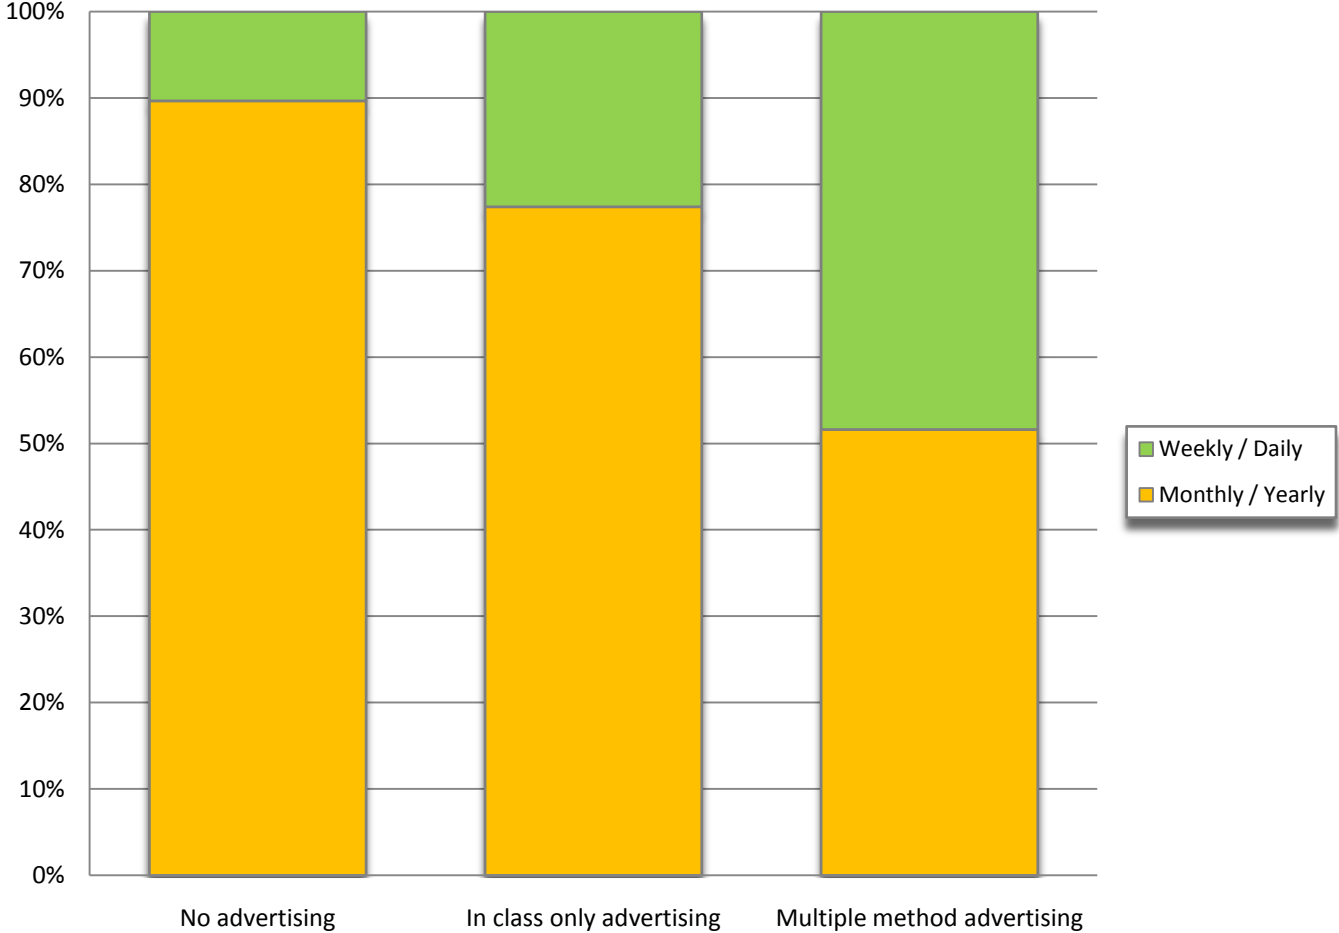

- 64% of librarians advertised the chat widget in a workshop.
- Librarians who used multiple ways of advertising:
 - spent [more time connected](#) to the chat widget
 - received chats [questions more frequently](#)

Number of hours connected to chat per week

Frequency of chat questions

Results: subject guide analysis

- Social sciences librarians advertise more and favour multiple ways of advertising.
- Social sciences & Humanities librarians receive more daily or weekly chats than Science / Engineering / Health sciences librarians.

Did you advertise the chat widget?

Consultations performed weekly or daily

	Math-Sci-Eng- Health	Social Sciences- Humanities
In person	63%	73%
Email	63%	86%
Chat	12%	43%
Phone	52%	37%

Results: age group analysis

- Millennials advertise more than other age groups
- Millennials and Gen X are connected longer hours to the chat widget than Baby Boomer.
- Millennials and Gen X more frequently received weekly or daily chats than Baby Boomers.
- Older Baby Boomers reported more consultations through traditional means (email, phone, in person).

Did you advertise the chat widget?

Number of hours connected to chat widget per week

Consultations performed weekly or daily

	Millennials	Gen X	Young BB	Older BB
In person	74%	54%	63%	92%
Email	70%	56%	65%	93%
Chat	39%	33%	13%	15%
Phone	9%	41%	48%	57%

Conclusions: should you have a chat widget?

Are you aged 24 - 39?

Do you work long hours in your office?

Are you a social person who advertises your services in as many venues as possible?

Are you a social sciences librarian?

Conclusion: positive effects of OCC

Out-of-class communication (OCC)

“student-faculty communication in the instructor’s office, informally on campus, or before and after class.”

(Balayeva and Quan-Haase 2009)

“OCC between students and faculty is associated with considerable **positive student effects**, including motivation, career direction, or pursuit of more advanced education, **satisfaction** with university, **retention**, personal and academic growth and **achievement**, and persistence”

(Balayeva and Quan-Haase 2009)

Thank you!
