If you started writing a paper with Write-N-Cite while your account was on the Scholars Portal server and you have now moved to the RefWorks servers, you will need to update a setting in order to be able to continue working on your paper.

Here is what you will need to do:

1. With your Word document open, go to the **File** Menu and click on the **Properties** drop-down menu on right and click on **Advanced Properties**.

2. Click on Custom tab of the Properties Menu and click on **WNCSubscriberID** and in the **Value** field, replace the current number (whatever it is) with **2898.**

3. Click **Modify** and then **OK.**

4. You might need to log out of WNC and back in if it doesn't take immediately.
